Overview

I am an experienced software developer, well versed in many platforms and tools, delivering high quality software and features. I am comfortable discussing requirements and engaging in heads-down coding during the sprint to deliver them. A lively debater and a passionate collaborator, I understand that the team succeeds together. I enjoy tackling hard problems and designing solutions with the big picture in mind. I love experimenting with new frameworks, learning new patterns and automating the tedious tasks. I have a talent for leading technical projects and driving initiatives. My curiosity fuels my hunger to continuously learn and improve my skill set.

Experience

American Family Insurance/ Senior Full Stack Software Engineer

October 2020 - PRESENT, Madison, WI

- Designed, collaborated and successfully migrated several applications to AWS.
- Implemented module federation between React and Angular so that both tools have the ability to consume the same code easily
- Effectively developed Angular components using NGRX, RXJS and best practices to deliver many business features.
- Eagerly learned new technologies on the fly such as NestJS, React, Astro, AWS services, development patterns, performance optimizations and anything that is needed
- Organized, designed and developed highly efficient CICD processes that include security scans, testing, and deployment to many environments
- Maintained a monorepo that included SPAs and APIs hosted on AWS. Actively stayed on top of the latest frameworks, releases and new patterns supporting industries best practices.
- Supported and resolved production incidents for applications that were utilized by millions of users.
- Reviewed, improved, and implemented complex reactive user interfaces.

Lunch Creek Web Designs / CEO

October 2023 - PRESENT, Kewaskum, WI

- Developed many HTML, CSS and JS templates to help small business with either websites and create a fluid mobile experience to drive sales
- Optimized sites using Google Core Vitals
- Created UX website experiences that provide a clear purpose to the customer to increase engagement
- Astro is the main library due to its speed and simplicity

Northwestern Mutual / Test Engineering Manager

July 2020 - October 2020, Milwaukee, WI

- Managed a group of 10 people across five feature teams.
- Improved development and testing processes to shorten the turnaround time for new features.
- Successfully achieved company goals and propelled testing maturity.
- Got directly involved with projects to support testing practices and advocated for high quality coding and testing standards.

Northwestern Mutual / Lead SDET

August 2016 - June 2020, Milwaukee, WI

- Leader of redesigning and utilizing modern test automation tools built upon Node, JavaScript and git.
- Streamlined many testing efforts to deliver results quickly which carved times for exploratory testing that found meaningful bugs before deployment.
- Developed and maintained testing frameworks that supported applications with thousands of users.
- Enforced best coding practice by reviewing merge requests with constructive feedback.
- Built many automation tools/frameworks from the ground up to meet specific needs.

Education

University of Wisconsin - Milwaukee / B.S. in Information Science and Technology

August 2016, Milwaukee

Undergraduate Coursework: Senior Capstone Website; Databases; Programming Languages; Networking, iOS and Android App development.
